

# Blink Analysis Report - *indrani*

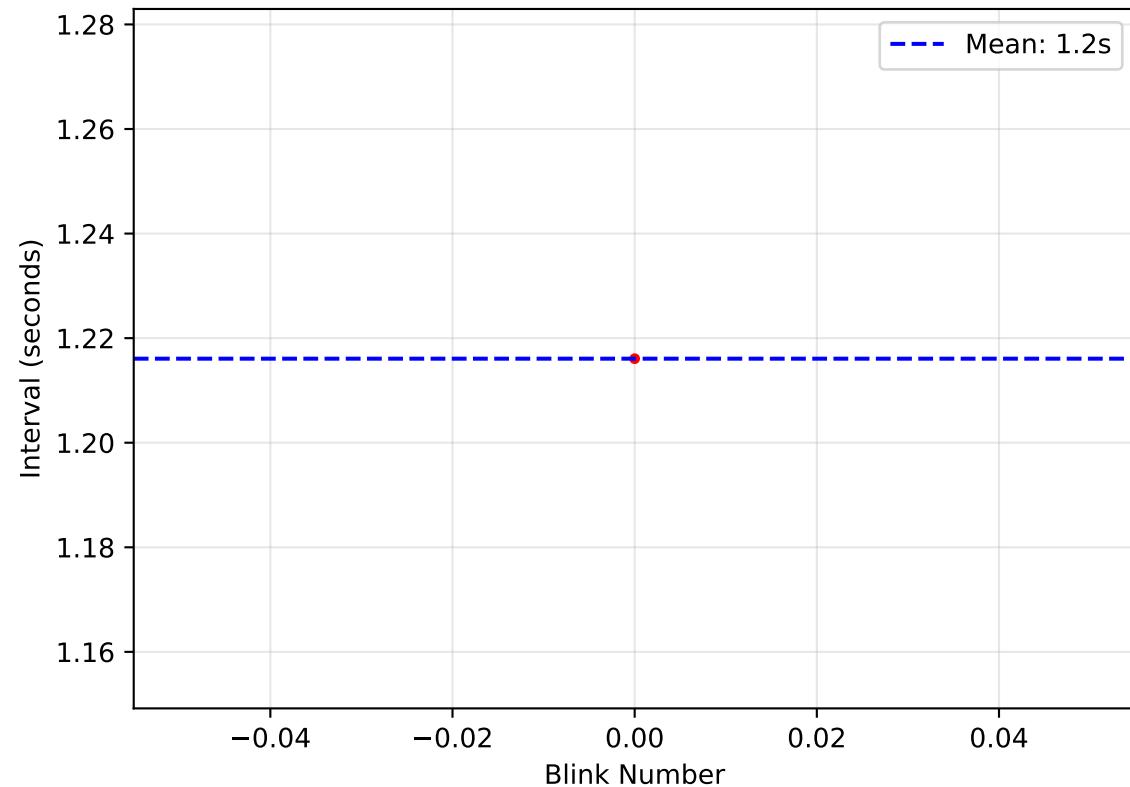

Cumulative Blinks Over Time

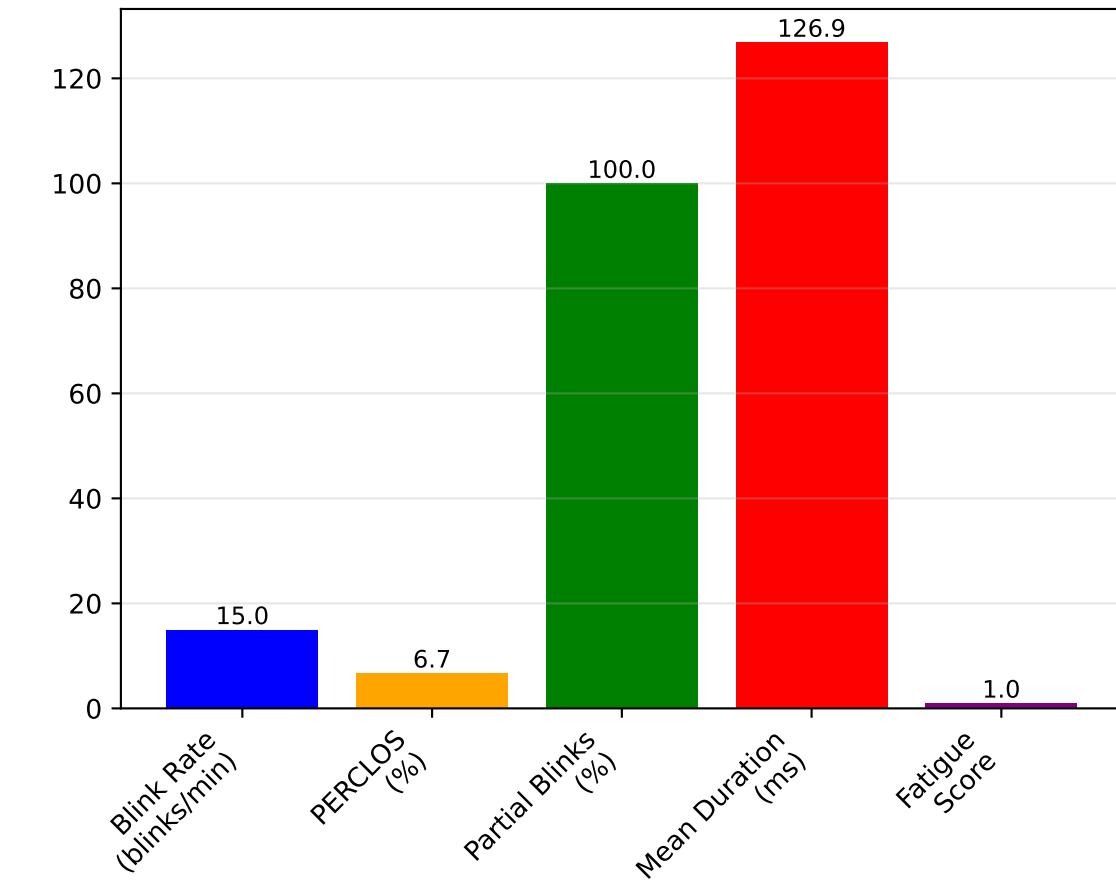

Blink Duration Distribution

Inter-Blink Intervals

Key Metrics Summary

# Clinical Results & Interpretation - **indrani**

## PATIENT INFORMATION:

Name: **indrani**

Date: **20260123\_165557**

Recording Duration: **60 seconds**

## QUANTITATIVE METRICS:

- Blink Rate: 15.0 blinks/minute
- Mean Blink Duration: 126.9 ms
- PERCLOS (Eye closure percentage): 6.7%
- Partial Blink Ratio: 100.0%
- Mean Inter-Blink Interval: 1.22 seconds
- Blink Consistency (CV): 0.000
- Fatigue Score: 1/10

## CLINICAL ASSESSMENT:

NO SIGNIFICANT DRY EYE INDICATORS

ALERT STATE MAINTAINED

## INTERPRETATION GUIDE:

- Blink Rate: Normal range is 12-20 blinks/min. Reduced rate may indicate fatigue or concentration.
- PERCLOS: Percentage of time eyelids are closed. >20% suggests fatigue or drowsiness.
- Blink Duration: Normal range is 100-150ms. Reduced duration may indicate dry eyes.
- Fatigue Score: Composite measure (0-10) based on blink metrics. >7 suggests significant fatigue.
